

Trust Begins
With Cyber
Security.

What we saw

Cyber Security is not failing, Alignment is.

Budget spends but
Exposure remains

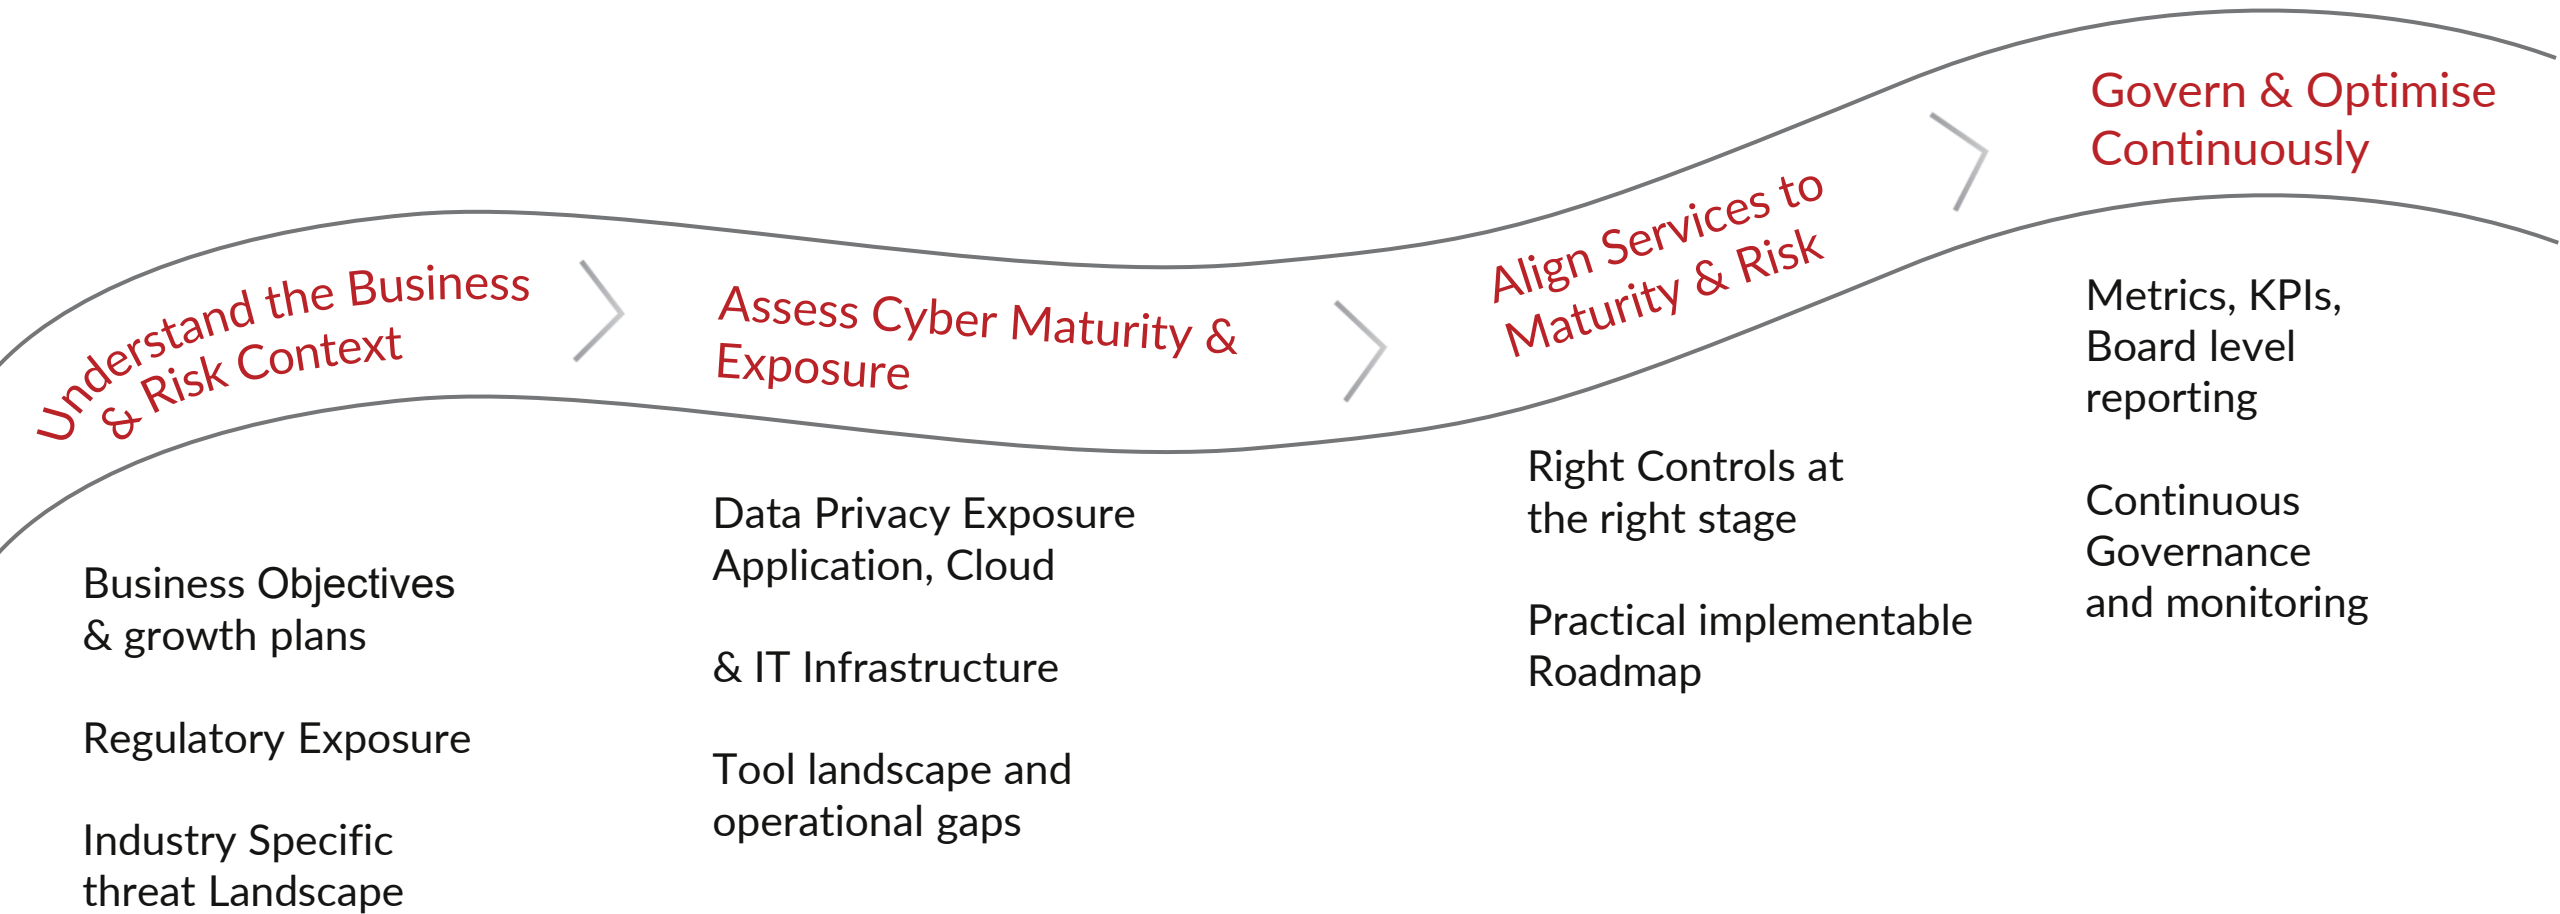

Limited cyber
expertise

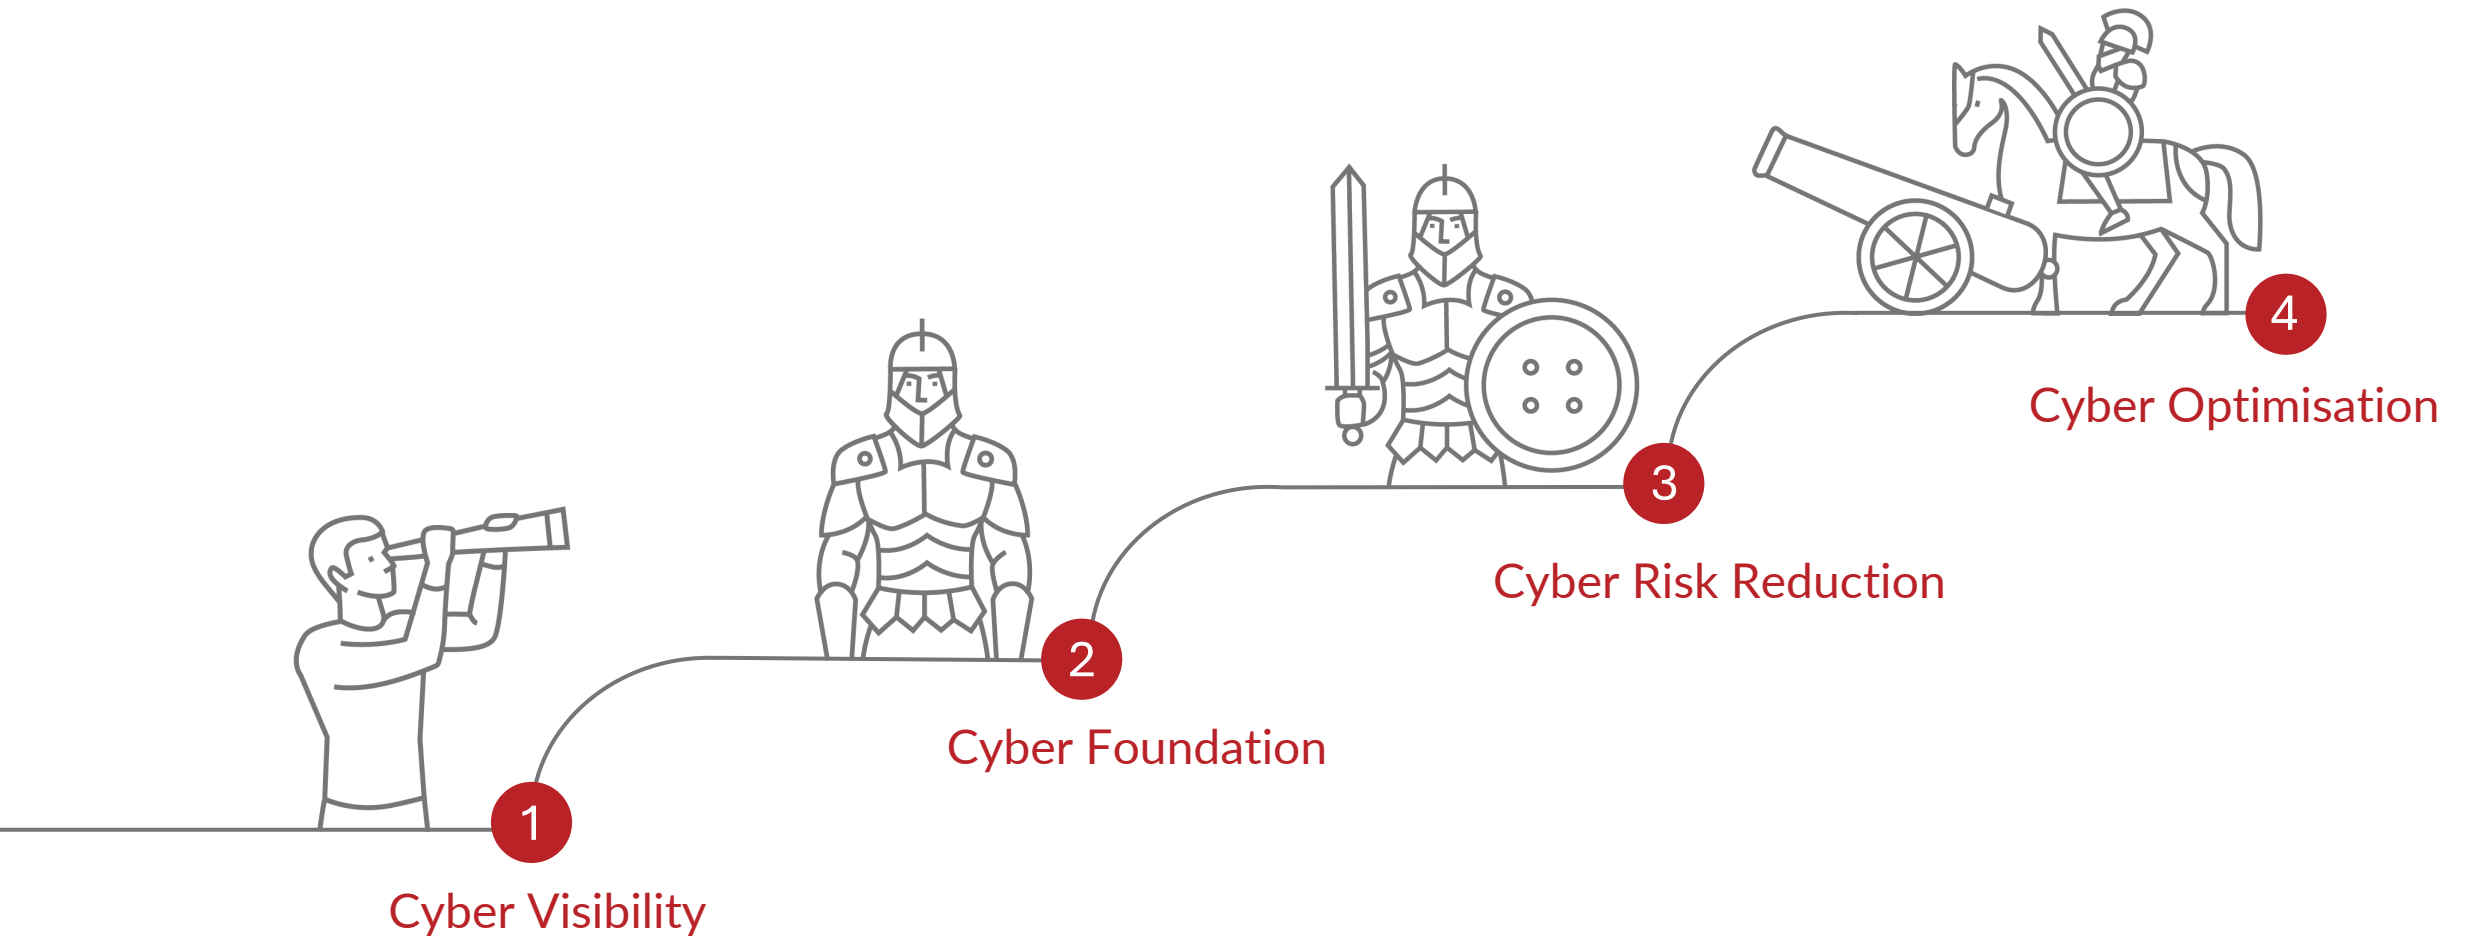

Cyber Security programme
built only for audits

Design for where you are

Built for where you are going

1 Cyber Visibility

What we typically hear

We are not sure where all our data is stored

We don't have a complete list of our IT assets

We have anti-virus, Firewall, DLP but we don't know if they are enough

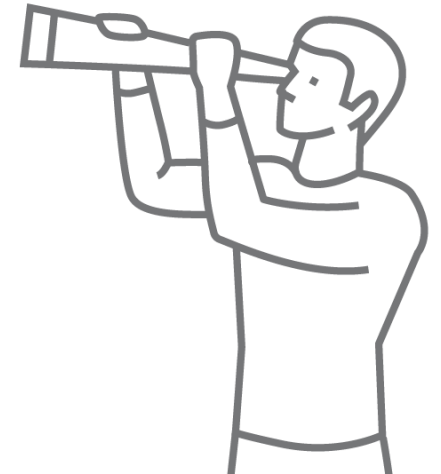

We implemented controls after audit observations

Outcome : From Uncertainty to Visibility

Our Solutions

- Cyber Security Gap Assessment
- Cyber Awareness session, Phishing simulation
- Website security assessment
- DPDP Dipstick assessment
- Tool Inventory and License review

2 Cyber Foundation

What we typically hear

We are secure because we passed the last audit.

We have ISO / SOC documentation in place.

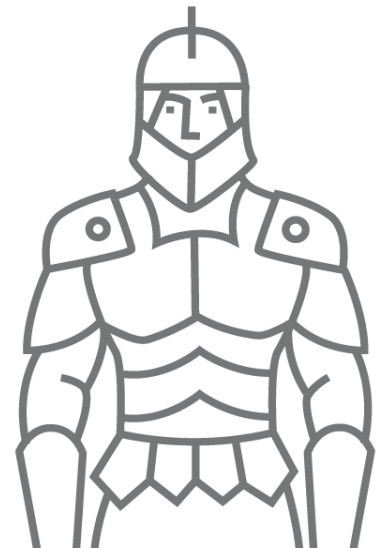

We are not sure if controls are consistently followed

Our Solutions

- ISO 27001/ SOC2 implementation
- Cyber Awareness session, C-suit Training,
- Phishing simulation
- Vulnerability assessment
- DPDP Assessment & Implementation
- Regulatory Audits

Outcome : From Documented Security to Operational Security.

3 Cyber Protection

What we typically hear

Our cloud footprint is expanding rapidly.

We are getting too many alerts

Third-party integrations are increasing

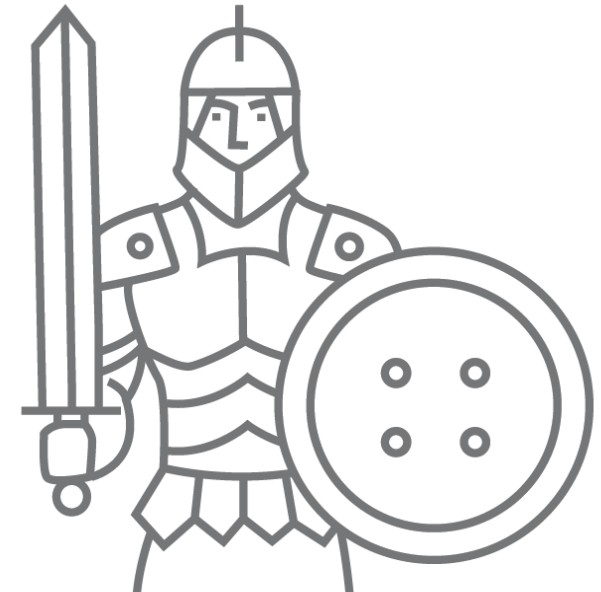

Applications are going live faster than we can review them

Our Solutions

- Cloud Security Assessment
- Vulnerability Management
- Security Posture Review
- Threat Modelling
- V CISO- Governance

Outcome : Managing Risk at Scale.

4 Cyber Optimisation

What we typically hear

How do we measure return on security investment?

How resilient are we if a major incident occurs?

Is cyber risk integrated into enterprise risk management?

Our Solutions

- Enterprise Risk Management (ERM)
- Security Posture Optimization
- Continuous Compliance & Sustenance
- V-CISO (Core Anchor Service)
- Managed Security & NOC Advisory
- Tabletop / Readiness Exercises

Outcome : From Security Management to Security Governance

Why Us?

- No Incentive to oversell tools
- Focus on optimization of investments
- Deep Understanding of Regulations
- End-to-end support until your team can manage independently
- Pool of Ex- Industry Experts

How to engage with us?

- One time assessment
- Compliance Driven engagement
- Ongoing advisory & VCISO model

Who we are

BHAKTI DALBHIDE

Head of Cyber Security

FCA, CISA, DISA, ISO27001 LA,
ITIL- Foundation, Data Privacy Lead
Assessor- DSCI.

VINAY HINGE

Principal Consultant

BE, MBA – IT strategy, Technology
implementation, Project & Risk
management, Information security
compliance

SAMRUDDHI PATADE

Senior Manager

CA, CISA – ITGC audits, Cyber &
Information System audits, SAP reviews,
SOC2 implementation, Banking audits

BHUSHAN REDIJ

Head Business Solution

CISA, ISO 27001 LA – IS governance,
Risk management, Regulatory
compliance, Privacy, Cloud security

SAVITA DADHWAL

Principal Consultant

M.Tech, CEH, eJPT – Enterprise VAPT,
Application security, IoT & Device
security assessments

TEAM EXPERTISE: OSCP, CEH, CRTP, Certified
Network Security Specialist (CNSS), CISA, DISA, LA ISO
27001.

EMPANELLEMENT: NICSI, MSCB, CERT-in, NSE, MCX,
BSE, NCDEX, MSEI

Our Clients

Banks

Insurance

NBFC

A name that signifies strength in unity. KGS represents something just as powerful: the convergence of distinct legacies, regional strengths, and shared values to create a transformative alliance.

SS Kothari Mehta & Co. anchors the North, **Guru & Jana** brings its dynamism from the South, and **Kirtane & Pandit** lends its legacy from the West. Together, they form KGS—an alliance defined by strength in diversity and unity in purpose.
